
Summary

Web Developer with a knack for creative problem solving. I love working in teams and contributing to projects that make a positive impact in the world. Creating dynamic, responsive, and interactive web design is what I do best.

Skills

Front End: JavaScript ES6, React, Redux, jQuery, HTML5, CSS3, NPM

Back End: Node.js, Express, MongoDB, PostgreSQL

Additional Tools: Git, GitHub, Slack, Chrome Dev Tools, Heroku, Netlify, Zeit

Technical Experience

Freelance Web Developer

11/2019 - Current

Solar Industry Startup

- Working alongside startup founders to create an online presence from the ground up by conducting research, testing and implementing various user tools.
- Building a mobile first website with HTML5, CSS3, Javascript and React.

THINKFUL

08/2019 - 11/2019

Full-Stack Web Development Program / Engineering Immersion

- Learned industry best practices and practical software development standards with a focus on HTML5, CSS3, JavaScript, jQuery, Node.js, React, Redux, and algorithms & data structures.
- Creating and deploying mobile-first applications while learning new languages and frameworks by collaborating every week with a senior web developer.

Projects Completed at Thinkful

PUERH / CAFE | [GitHub Repo](#) | [Live Site](#): This app helps users organize their pu'erh teas by adding collections and tasting notes.

- Built and deployed a scalable, modular software product.
- Integrate PUERH / CAFE api to allow users to access and display data.

Built with: React, Redux, Node, Express, PostgreSQL, and CSS

Hot Takes | [GitHub Repo](#) | [Live Site](#): Keeps track of the 'hot takes' sports commentators have, to see who is the most reliable.

- Allow users to add commentators and takes, providing a platform to decide which commentators they should follow.
- Designed and developed the backend API, which persists end user data.

Built with: React, Redux, Node, Express, PostgreSQL, and CSS

Travel TV Search | [GitHub Repo](#) | [Live Site](#): A search engine for finding travel tv shows based on an input location.

- Designed and developed the search feature to allow end users to discover travel TV shows.
- Integrated Google Maps API and TVMaze API to display results based on the end user's search.

Built with: HTML, CSS, Javascript, jQuery, Google Maps API, and TVMaze API
